

Biography

Jeffrey M. Jacobs
Vice President, Hydrogen Unit
Chevron Technology Venture, LLC

Jeffrey Jacobs currently leads the strategy, planning & business development activities for Chevron Technology Ventures Hydrogen Unit. The Unit is responsible for the integration and commercialization of emerging energy technologies such as advanced fuel processing and fuel reforming for the distributed production of hydrogen from a variety of feedstocks. Chevron's innovations and development of such applications may be used for both stationary power generation and mobile applications for customers in the commercial, industrial, institutional and public sector markets.

In a previous role with Chevron, Mr. Jacobs was responsible for the design, sales and delivery of power quality, power reliability and distributed generation products and services throughout the United States. In that capacity, he was also responsible for commercializing new energy technologies and developing customized energy solutions nationwide.

He has over 18 years of experience in the unregulated energy industry, and has also held management and executive roles at PG&E Corporation, PennUnion Energy Services, Power Gas Marketing & Transmission and Texaco. In these positions, he developed new markets for retail power and natural gas sales, negotiated strategic alliances, led new business ventures, and directed both financial and energy operations.

Mr. Jacobs holds a Bachelor of Arts degree in biology/geology from Amherst College, a Masters of Science in marine studies/geology from the University of Delaware, and an MBA in finance and economics from the Katz Graduate School of Business at University of Pittsburgh.
